

ISO 37001: 2016

ANTI-BRIBERY MANAGEMENT
SYSTEMS

INTRODUCTION

ISO 37001: 2016

ISO 37001 is the international standard for anti-bribery management systems. The standard is designed to specifically assist many organizations in implementing and maintaining key measures which assist them in preventing, detecting and addressing bribery across your organization and its business activities.

In an age of transparency, no organization can afford to take the risk of bribery lightly. Investors, business associates, personnel and shareholders all need to be assured that the management has made every possible effort to prevent bribery at all levels of your organization.

Implementing the ISO 37001 and certification through an independent third party enables you to do exactly that.

The ISO 37001 standard is designed to help an organization implement and maintain a proactive anti-bribery system.

The standard provides a number of requirements that represent globally recognized good practice for anti-bribery.

Why Your Organization Should Get ISO 37001

ISO 37001 helps with the procurement process specifications which often require a certification as a condition to supply, so certification opens doors for organizations.

It also guarantees delivery of products that consistently meet customer requirements and a service that is dependable and can be relied on.

It serves the overall interest of your organization when obtaining an ISO 37001 certification as it helps to improve the perception of your organization with staff, customers and suppliers.

It will also help your organization understand how statutory and regulatory requirements impact both your organization and its customers.

ISO 37001 provides the minimum requirements and supporting direction for implementing an effective anti-bribery management system.

The implementation remarkably reduces the risk of malpractice because the standard was designed to help your organization prevent bribery.

Importance Of ISO 37001

With an ISO 37001 certification your organization will have acquired a common approach in the supply chain for supplier or subcontractor development, driving consistency, competence and control.

Implementing ISO 37001 will open your organization to external scrutiny of the effectiveness of your anti-bribery policies and processes.

It demonstrates compliance to relevant legislation and collaboration with relevant stakeholders to monitor and manage risk throughout your organization and supply chain. Using this standard, your organization will also ensure that suppliers, sub-contractors and agents are committed to anti-bribery best practice

Benefits Of ISO 37001

Certification to ISO 37001 provides assurance to management, investors, business associates, personnel, and other stakeholders that an organization has taken appropriate measures to prevent bribery.

Reduce the risk of bribery – by helping you implement an anti-bribery management system, ISO 37001 can reduce your risk of bribery. Protect your reputation – ISO 37001 certification helps you build confidence and trust in your brand and promotes transparency.

Demonstrate compliance with regulations ISO 37001 provides guidance so you can comply with national and international regulations.

Enhance relationships – with ISO 37001 certification, you can show your stakeholders that you have internationally recognized controls in place.

Build legal protection – ISO 37001 certification proves you have taken measures to prevent bribery.

Establish an ethical business culture – by involving all employees in your anti bribery policy and activities, ISO 37001 helps you build an ethical culture.

Who Can Use ISO 37001

The standard is flexible and can be adapted to a wide range of organizations including:

Large Organizations Small & Medium Sized Enterprises. Public, SOEs, and Private Organizations Non Governmental Organizations. The standard can be used by organizations in any country.

About DTA

Delta Tech Africa Limited Is An ICT And Quality Consulting Organization Focused On Performance Management Across Business Verticals. Delta Means“ A Finite Increment”.
