

**ISO 55001: 2014**  
ASSET MANAGEMENT

# INTRODUCTION

## ISO 55001:2014

ISO 55001 will help your organization proactively manage the maturation of your assets from acquisition to withdrawal. Certification to ISO 55001 will help you realize the value of your company's assets whether they be physical possessions, intellectual properties, or brand reputation.

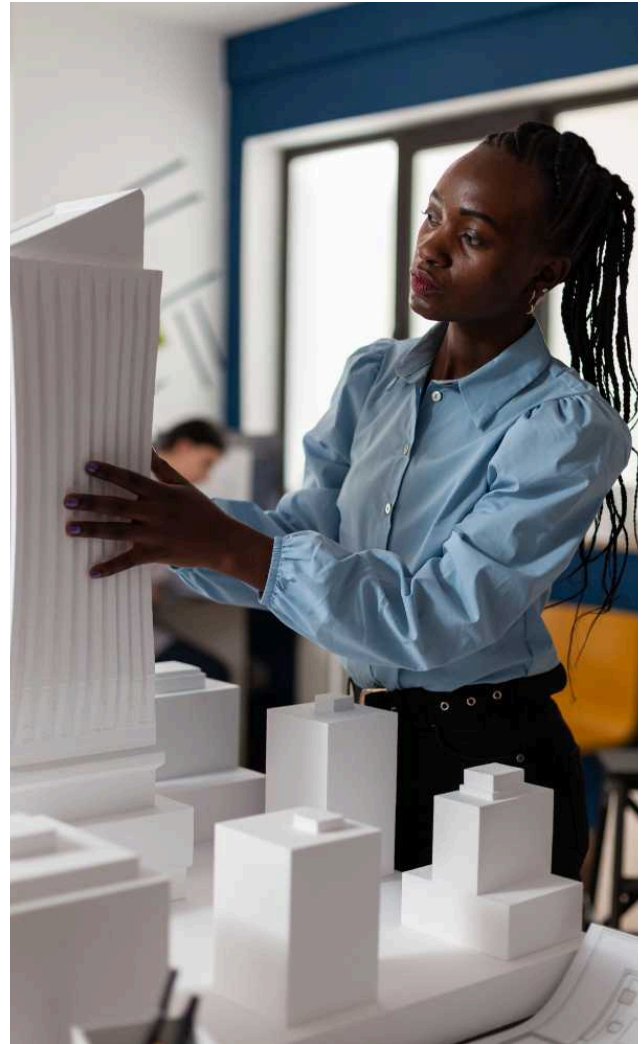

Once these assets are realized ISO 55001 can help identify risks associated with ownership which can then be studied and reduced, allowing for continuous improvement within your organization. Your stakeholders will gain confidence that a strategy is in place to ensure that your assets meet international requirements for safety and quality.

ISO 55001 aims to apply this approach across other sectors allowing all businesses to benefit from it. It is designed to provide structure and guidance to an Asset Management System (AMS) to manage and mitigate risk, whilst benchmarking performance across all sectors and improving financial performance in line with organizational growth strategies.

### Why Your Organization Should Get ISO 55001

ISO 55001 offers good governance, and a good understanding and control of assets; it can improve stakeholder confidence (e.g. customers and regulators acting on behalf of customers) and result in lower premiums.

Presently the following HSE, Security, Information Security, Quality, Environment and Business Continuity Programs require current knowledge of assets and effective management of assets and related risks.

The introduction of an all-inclusive AMS into the integrated management systems adds significant value to the overall Risk and Business Management Model of your organization.

### Importance Of ISO 55001

ISO 55001 provides procurement specifications often required for certification as a condition to supply, so certification opens doors for your organization.

It also deliver products that consistently meet customer requirements and a service that is dependable and can be relied on.

The standard will also improve the perception of your organization with staff, customers and suppliers and also help them understand how statutory and regulatory requirements impact your organization and its customers.

Being able to demonstrate to the regulator or other stakeholders that you control your asset management; to set a specific objective during the implementation of improvements in the field of asset management.

## Benefits Of ISO 55001

ISO 55001 asset management allows large organizations to standardize and simplify plants and equipment, reducing costs for spares and supplies, as well as training and support.

The optimized asset management programmes assure maximizing the value and taking advantage of the opportunities for growth.

Effective improves asset both management personal and process safety, reducing the risk of injury and catastrophic events.

The proactive risk management and operational management of assets, assures minimizing the probability of incidents and accidents.

## Targeted Customers

All organizations have assets, and can all enjoy the benefit of ISO 55001 certification.

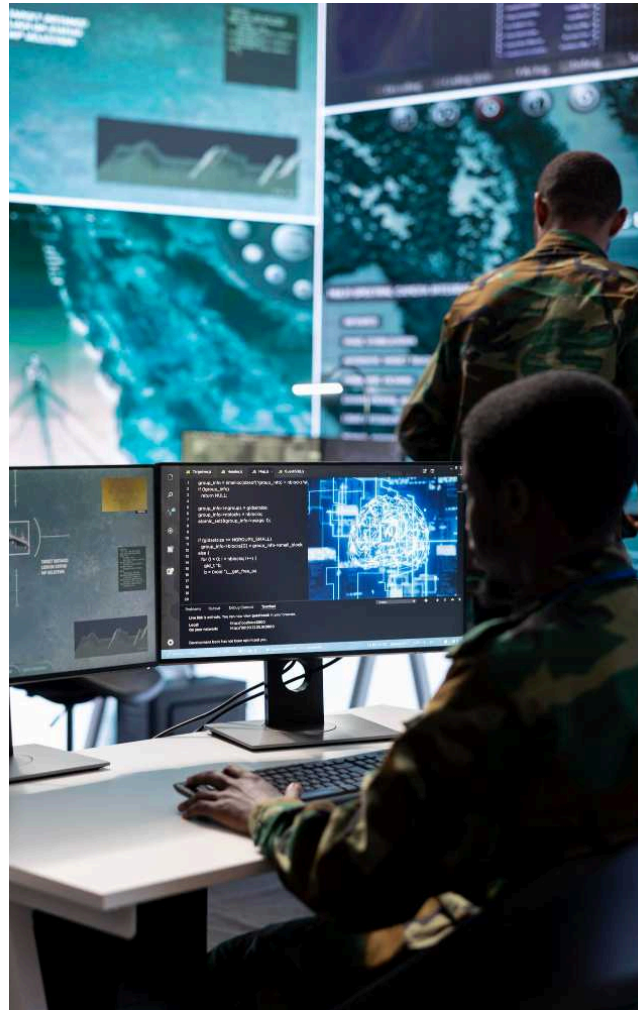

However, the standard typically delivers the most value in capital intensive industries, which includes utilities, Real Estate, Oil Gas, Construction, Manufacturing, Transportation, and distribution.

Any organization that is interested in becoming ISO 55001 certified needs to conduct a gap analysis of the existing asset management system.

## About DTA

Delta Tech Africa Limited Is An ICT And Quality Consulting Organization Focused On Performance Management Across Business Verticals. Delta Means“ A Finite Increment”.
